Jaina Temple Architecture in India

Julia A.B. Hegewald

Jaina Temple Architecture in India is the first comprehensive study of the development and uniqueness of Jaina sacred structures. The monograph analyses Jaina temples in all regions of the Indian subcontinent and outlines clear continuities by covering the period from the early centuries BCE till the present day. It identifies a distinct approach to the shaping of ritual space in Jaina temple edifices, which involves often complex spatial layouts on numerous vertical levels. These accommodate a multitude of venerated sacred objects and mirror specific Jaina ritual needs, patterns of worship as well as the translation of specific Jaina mythological and cosmological concepts into architecture. These aspects of multifaceted spatial planning are shown to be equally common to Jaina temples in the diaspora outside India.

Julia A.B. Hegewald is Professor and Head, Department of Asian and Islamic Art History, Institute for Oriental and Asian Studies, University of Bonn, Germany.
